

Condo Manager

System Requirements

Condo Manager runs on Windows and is easy to install. It can be run on a single computer or by several users on a network..

Requirements for Workstations:

- Windows XP Pro (recommended), Windows Vista Business;
- 10 Gg of Hard Disk;
- 1 Gb of memory;
- 10 or 100 Mb Ethernet card;
- Pentium 4 or better processor;
- Printers: Works with any printer supported by Windows 2000/XP/Vista/Server 2000,2003 or 2008;
- Internet: All online services/features require Internet access with at least a 56 Kbps modem (DSL or cable recommended).

Notes: For Condo Manager On Line the operating system must be Windows XP with Service Pack 3 installed or Windows Vista with Service Pack 1 installed

Requirements for File Server:

If you are planning to use Condo Manager in a multi-users environment, you will need to install the Condo Manager databases on a file server.

- Windows Server 2000, 2003 or 2008;
- 80 Gb hard disk (redundant configuration recommended);
- 2 Gb of memory;
- 10 or 100 Mb Ethernet card;
- Dual-Core or Quad Core processor .

Depending on the number and the size of the associations you manage and the number of users you need, a less powerful file server can be used. Please call and we will help you determine if your current equipments is compatible.
